DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Werner Stemer on 01/05/06.

The application has been amended as follows:

- Claim 8: The applicant agreed to delete the whole claim and amended the claim as following: -- **A method for producing the semiconductor laser according to claim 1** – in order to rejoin the claim following the restriction requirement on 12/08/05.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claim 1 has been allowed over the Houdre et al. and Hutchinson et al. prior art because they fail to teach, taken singly or combined, the limitations of at least one of resonator end mirrors and gratings for bringing about an occurrence of an envisaged number of discrete modes in said sections, said discrete modes have spacings from one another and differ in said two sections of said resonator structure; and photonic crystals disposed at least at said longitudinal ends of said resonator structure, said photonic crystals having, as a band gap in which no wave-

guiding takes place, a wavelength range in which a principal wavelength of the tunable semiconductor laser lies or a maximum gain of the tunable semiconductor laser occurs.

Houdre et al. disclose in Fig.2b the photonic crystals disposed at only one side of the diffraction grating. Whereas, Hutchinson et al. disclose in Fig.4 the photonic crystals (402) disposed at the middle of the gratings (407-408). None of Houdre et al. and Hutchinson et al. disclose at least one of resonator end mirrors and gratings for bringing about an occurrence of an envisaged number of discrete modes in said sections, said discrete modes have spacings from one another and differ in said two sections of said resonator structure.

Claims 2-8 have been found allowable due to their dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
